

Kivi Corn

Senior Front End Developer

 Tyne and Wear, UK

Senior Consultant working with award winning digital agencies, GovUK, and public sector organisations.

Delivered Web & Mobile Applications for the Bank of England, Sport England, NHS Digital, and the Commonwealth.

Progressing towards the AWS Cloud Solutions Architect certification.

Proficient in design, development, optimisation, testing, deployment and project management.

Distinguished track record of success in full-stack JavaScript libraries and frameworks - React, Next.js, Typescript, UI/UX and Web Accessibility.

Scored in the top 5% of all the participants in multiple technical assessments.

I am a passionate, motivated team player who always contributes positively, with a helpful attitude and a pleasing disposition.

Portfolio

A portfolio site for clients and employers to read about me and view my work.

[View project](#)

Bhutan

I had the privilege to infuse the kingdom of Bhutan's rich culture, proud heritage, and bold ambitions into their new online home.

[View project](#)

Commonwealth - Tradereview

The Commonwealth is an association of 54 independent countries. I had the privilege of developing 2 of their websites. The day it launched, these sites had over 100,000 views from across the globe.

-  WCAG Compliance
-  Performance analysis

-  HTML5
-  CSS/Sass
-  JavaScript
-  React.js
-  Next.js
-  Typescript
-  React Native
-  Node.js
-  Express.js
-  MongoDB

App Development

North East Ambulance ePRF System

I independently conceptualised, developed, and managed a groundbreaking web and mobile app for a Northeast ambulance service. This product has completely transformed their data analysis and operational efficiency. It has recently garnered significant attention from the NHS and other ambulance services, showcasing its potential for widespread impact and innovation.

Virgin Trains Ticketing

I joined a tech squad for the development of a website and mobile app for Virgin Trains Ticketing, the UK's second largest digital rail and technology platforms. The app recently won the App of the year award in the UK E-Commerce Awards. (2023)

[View project](#)

Data Mining and Visualisation Platform

This bespoke service empowered the organisation's administrators to effortlessly

1. Handle user accounts
2. Filter, analyse, and export data
3. Automate tasks
4. Manage incident reports

Employee timesheet tracker

The new software solution replaced the company's outdated method of paper timesheets and manual Excel entries, providing employees with a user-friendly platform to seamlessly log working hours. The app not only enhanced accuracy in time reporting but also automated payroll calculations and billable hours, resulting in increased operational efficiency.

Game Development

React memory game

My first ever React project, back in 2017! This is a classic memory game built with React

“ We've been using Kivi's services for about 3 years, and on multiple projects. He's my “go to” guy. I can't say enough about the professionalism, attention to detail, and vast technical knowledge he possesses on multiple levels. In addition to all the special skills he's gifted with, Kivi also gives old school customer service like I've never seen elsewhere. Kivi has a keen eye for design, is a master of JavaScript & several other programming languages, and has a creative/artistic way about him that allows him to use all of his skill in synergy to bring a project full circle, on time and with a high degree of professionalism. I can't say enough about Kivi Corn. But, if you're considering hiring Kivi for yourself, I'd like to ask you to give it a second thought because I'm selfish and would like to keep him as my own personal “secret weapon” as long as possible!!! (of course, I'm just kidding). On a serious note, word is getting out that this guy is good at what he does. Hire him before he's all booked up.

— *David Ehrman, CEO Kriah Institution*

Education/Courses
